

## Students Preparing for the Workshop

### Virtual Workshops

Nancy Prince

Thanks for signing up for one of my Zoom workshop. Zoom workshops are not like on-site workshops in that I will not physically be there to help you with machine problems nor will I be able to look over their shoulder to see how you are progressing. To hopefully avoid some problems the day of the workshop and knowing that some of you may not be overly familiar with thread painting I have prepared a list below on preparing for the workshop.

### Preparing for a Successful Workshop Day

- Zoom workshops may be new to many of us and my aim is to transfer you from an on-site workshop to a Zoom one as free of issues as possible. While I will not be there physically, the process for teaching you a technique remains the same.
- Go to [www.nancyprince.com](http://www.nancyprince.com) and click on Workshops and Lectures then Virtual. Under each workshop selection there are 5 links. Clicking on each of these links will bring up the links listed below. Print the two documents, view the two videos and click on Purchase the Workshop Kit to order the kit and hoop if needed
- **Supply List** - lists the supplies needed and a few free-motion feet and machine tips. A picture of 2 hoops will show you the type of hoop you will need – either a plastic or wooden machine embroidery hoop plus appropriate free-motion feet.
- **Purchase Workshop Kit** - A kit is required for the workshop and should be ordered at least **1 week in advance** of the workshop date to allow for processing and shipping. Registering for the workshop **at least 7 days** before the workshop date confirms the kit can be shipped by USPS First Class Service Retail for East and Central US. Registering at 7 days of the workshop date will require USPS Priority shipping for West Coast to allow for processing and shipping. The workshop kit includes everything you will need to participate in the workshop *except* for the items listed on the Supply List such as thread, hoop, fabric, etc. For those of you using 40 weight polyester or rayon on the top spindle Superior's 60 weight Bottom Line thread is recommended for the bobbin in a light and dark color but not mandatory for workshop day. If using 50 weight cotton, then use 50 weight cotton in the bobbin. The hoop (this is a machine embroidery hoop and NOT a hand embroidery hoop) and bobbin thread can be purchased on my website at the time of registering for the workshop.
- **Thread Painting Stitches – video** – please watch this 9 minute video which shows the difference between the straight and zigzag stitches which will be the only two stitches you will be using in the workshop.
- **Setting Up Your Machine for Free-motion – video** - please watch this 19 minute video as it will walk you through the steps to set up your machine for free motion. I have discovered over 20 years of teaching that many students are unfamiliar with the necessary requirements for successful free-motion whether you are thread painting or quilting.

### Getting Ready

- To assure each student has the necessary items for a successful workshop, I will email each of you a few days before the workshop to see if there are any questions regarding the workshop and to give you an idea what to expect on the workshop day.
- The live or recorded demonstrations are copyright protected so please do not share or record them for your own use or to share with someone else. Please respect the copyright laws and this in turn respects my time and work.
- At the workshop you will be directed on how to contact me for questions. This way I can personally attend to you should you want to be critiqued or to help correct a problem.

## Homework –Before the Workshop Day

- Homework!! Just when you thought you were in a place where homework didn't exist then I come along and ruin everything. Zoom workshops are not like on-site workshops in that I will not be there physically but that doesn't mean that I won't be there to help. To hopefully avoid some problems the day of the workshop and knowing that some students may not be overly familiar with thread painting there is a little bit of homework to do before the day of the workshop. Now most of it consists of sitting in front of a computer or laptop screen and your sewing machine so how hard can that be??
- View the two videos *Thread Painted Stitches* and *Setting Up Your machine for Free-motion* listed on the first page. These videos can be watched as many times as you wish and whenever you want.
- **Practice kit** – OK, now the videos are out of the way and you have your sewing machine set for free-motion and you have received your workshop kit. In your workshop kit you will find a small piece of muslin, a piece of stabilizer and instructions. Follow the directions to complete your homework. This part of the homework consists of just a bit of practice to get you used to moving the hoop.
- In under an hour you should be ready for a problem free day of thread painting. Preparing for the workshop ahead of time assures a fun and self-assured day.
- Any questions before the day of the workshop? Then email me at [nancy@nancyprince.com](mailto:nancy@nancyprince.com) before the workshop and I will be able to answer your questions.
